# High Wind Structural Warranty

Engineered with iDrive Power Systems

## Eligible Fence Types & Height

This High Wind Structural Warranty applies to MW Fence Co installed fence systems up to a maximum height of **6 feet**, including:

- Wood picket and wood privacy fences
- Vinyl picket and vinyl privacy fences
- Ornamental steel fences
- Aluminum fences
- Chain-link fences

All fence systems must be constructed in accordance with MW Fence Co and iDrive Power Systems installation standards to qualify.

## Warranty Term

**Standard Coverage:** Three (3) years from the date of installation.

**Optional Upgrade – Triple Threat Guarantee:** Coverage for as long as the original purchaser owns the home where the fence was installed. The Triple Threat Guarantee must be selected at the time of purchase and documented in writing.

## What's Covered

Covered fence systems are warranted against structural failure due to sustained wind speeds up to 100 mph when installed with 2½" Schedule 40 galvanized steel posts and built according to MW Fence Co specifications.

- Steel post bending at or above ground level
- Fence section collapse due to wind pressure
- Rail or panel detachment caused solely by wind load
- Structural leaning resulting directly from sustained wind force

### **Gate Coverage**

Gates are covered under this High Wind Structural Warranty only if they are installed with an Insta-Gate® metal gate frame system by MW Fence Co. Gates installed without an Insta-Gate metal frame are not covered under this wind warranty.

### **Verification Requirements**

- Clear photos of the damaged fence
- The date and location of the weather event
- Weather documentation from a recognized source verifying sustained wind speeds
